## How this plan works

Moses and his wife are expecting their firstborn soon. In preparation for this new chapter in his family's journey, Moses decides to invest in the Takaful Future Select Plus plan. The plan will provide financial protection for his family and potentially grow his savings for his family's future needs.

At Year 19, Moses makes a partial withdrawal from the plan's investment-linked savings to help cover the cost of his first-born's university education.

At Year 3, Moses and his wife welcome their second child. He decides to increase his protection to RM550,000 with the life event sum cover increase option.

Moses chooses to participate in the plan with a sum covered of RM500,000 up to age 60 when he plans to retire.

Moses retires as planned at age 60 and his takaful plan matures at the same time.

Moses receives a payout of 100% of the remaining Personal Savings Account value + RM25,000 Maturity Booster benefit (5% of sum covered).

Moses uses the Maturity Booster benefit for his second child's educational expenses. He uses the savings from his investment-linked returns to fund his retirement years.

### Investment-linked funds

The contribution you made (less Wakalah Fee) will be invested into the investment-linked fund(s) of your choice. Each investment choice has its own inherent risks and is subject to market value fluctuations. The value of the investment-linked funds will be based on actual performance and the investment return is not guaranteed. The investment risk of these investment-linked funds will be borne solely by you. In the worst-case scenario, the value of your investment fund(s) under the plan may be worth substantially less than the original total contribution amount you have invested in the plan. Please refer to the Fund Fact Sheet for the description of the underlying investments and the associated risks of each fund.

### Participant's Risk Fund

The monthly Tabarru' will be deducted from your Participant's Savings Account and credited to Participant's Risk Fund from which protection benefits are paid. As a reward for managing and administering the Participant's Risk Fund, the Takaful Operator is entitled to an incentive equal to 50% of the surplus to be distributed. The balance 50% of the surplus will be distributed among eligible participants and your entitlement will be allocated yearly as additional units in the Participant's Savings Account.

### Surrender

In the event of a surrender, the Participant's Savings Account and unused tabarru' will be paid. However, you will lose the benefits under this Certificate and the amount payable to you may be less than the total contribution you have made. You will no longer be entitled to any portion of payments from the Participant's Risk Fund upon your surrender of this plan.
